

How to use the macros to edit files from Tick@lab or PyRat with Microsoft Office

Hint: Tested with Microsoft Office 2007

Please contact Fabian Monheim (fabian.monheim@leibniz-fli.de , 03641-65-6872) if you have a question or the macro is not working properly.

1. Download macro and unzip it
2. Save the PERSONAL.XLSB. Please rename the PERSONAL.XLSB file, if a file with the same name already exist.

2.1. Windows: save PERSONAL.XLSB to the folder

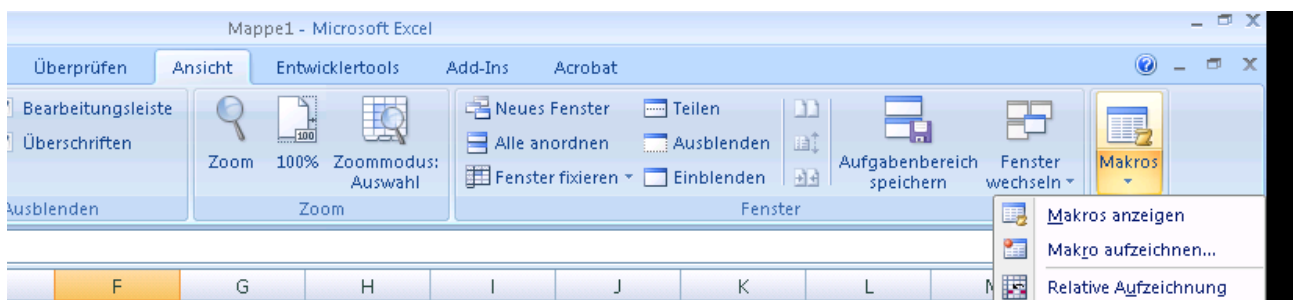

C:\Users\[Username]\AppData\Roaming\Microsoft\Excel\XLSTART\

2.2. MAC OS: save PERSONAL.XLSB to the folder

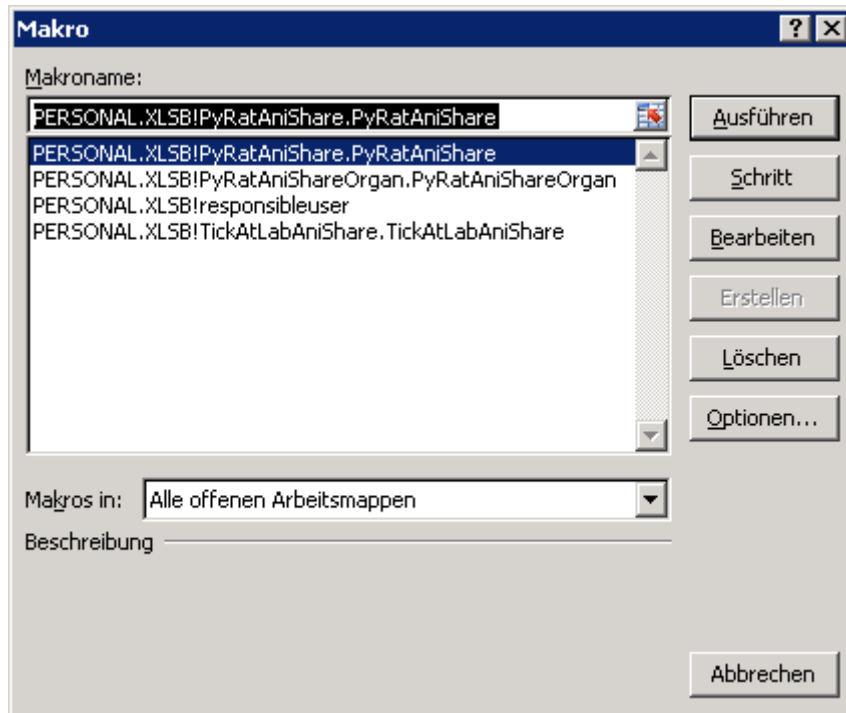

~/Library/Containers/com.microsoft.Excel/Data/Library/Application Support/User/Personal Macro Workbook

3. Run the macro (see also <https://support.office.com/en-us/article/create-run-edit-or-delete-a-macro-fc5fb55d-124d-4cc7-bae0-111c9c26e234>):

3.1. Go to *View* → *Macros* → *View Macros* (*Ansicht* → *Makros* → *Makros anzeigen*)

3.2. Select Macro and run it

Source System	Animal or Organ	Function
PyRat	Animal	PERSONAL.XLSB!PyRatAniShare.PyRatAniShare
PyRat	Organ	PERSONAL.XLSB!PyRatAniShareOrgan.PyRatAniShareOrgan
Tick@Lab	Animal	PERSONAL.XLSB!TickAtLabAniShare.TickAtLabAniShare

4. It's possible to add a keyboard shortcut to run the macro (see

<https://support.office.com/en-us/article/create-run-edit-or-delete-a-macro-fc5fb55d-124d-4cc7-bae0-111c9c26e234>):
