

Use pyrat anishare libreoffice animal macro with LibreOffice

Hint: Tested with LibreOffice Version 6.0.4.2.

Please contact Fabian Monheim (fabian.monheim@leibniz-fli.de , 03641-65-6872) if you have a question or the macro is not working properly.

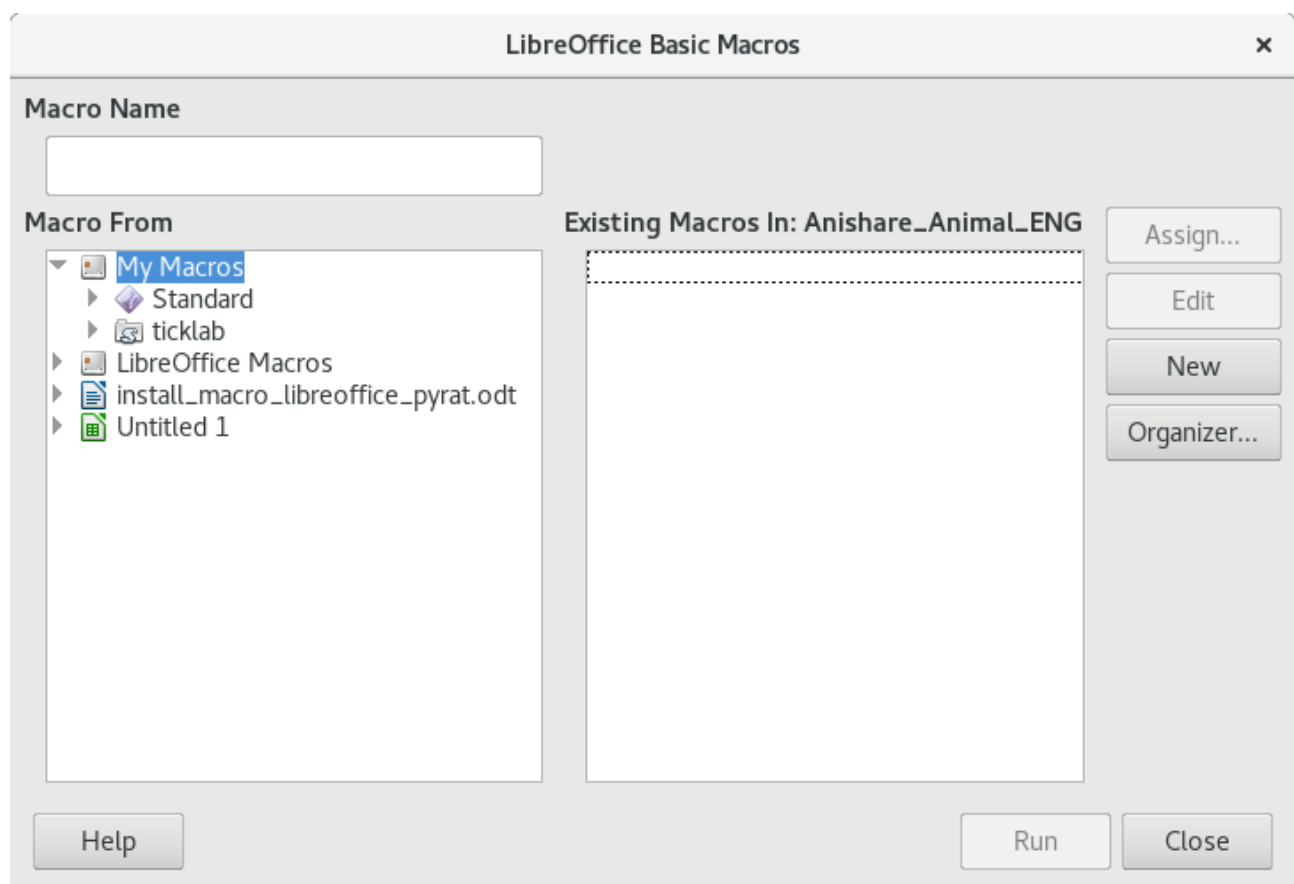

1. Download macro

http://anishare.leibniz-fli.de/static/macros/libreoffice/pyrat_anishare_libreoffice_animal_macro.zip

1.1. Unzip

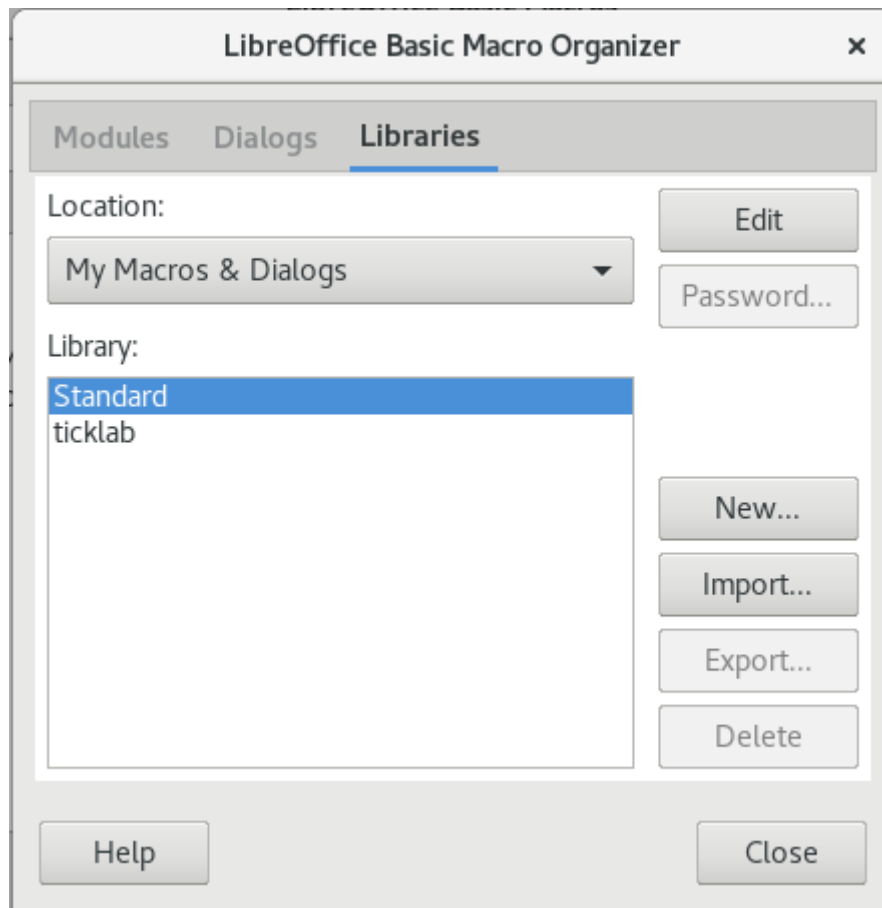

2. Open LibreOffice Calc

3. Go to *Tools* → *Macros* → *Organize Macros* → *LibreOffice Basic ...*

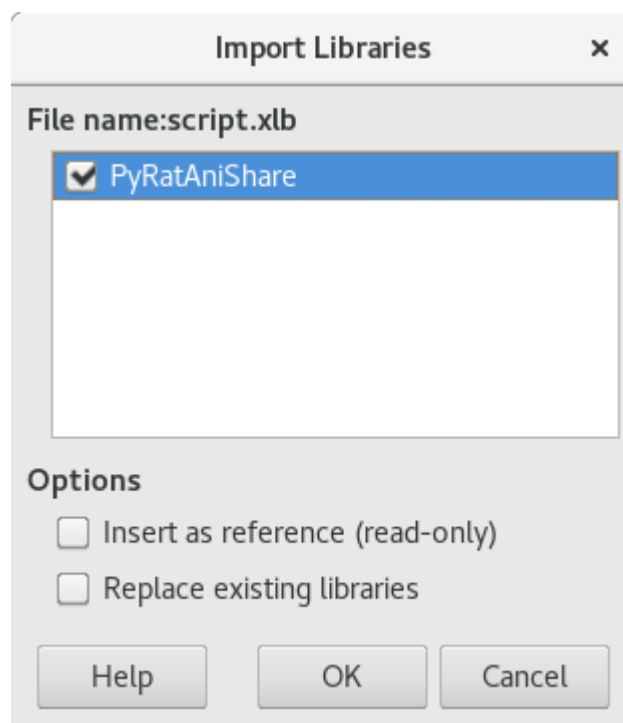

4. Click the *Organizer...* button on the right side

5. Go to *Libraries*

6. *Import...* the library with the macro. Choose at the import dialog the *script.xlb* file.

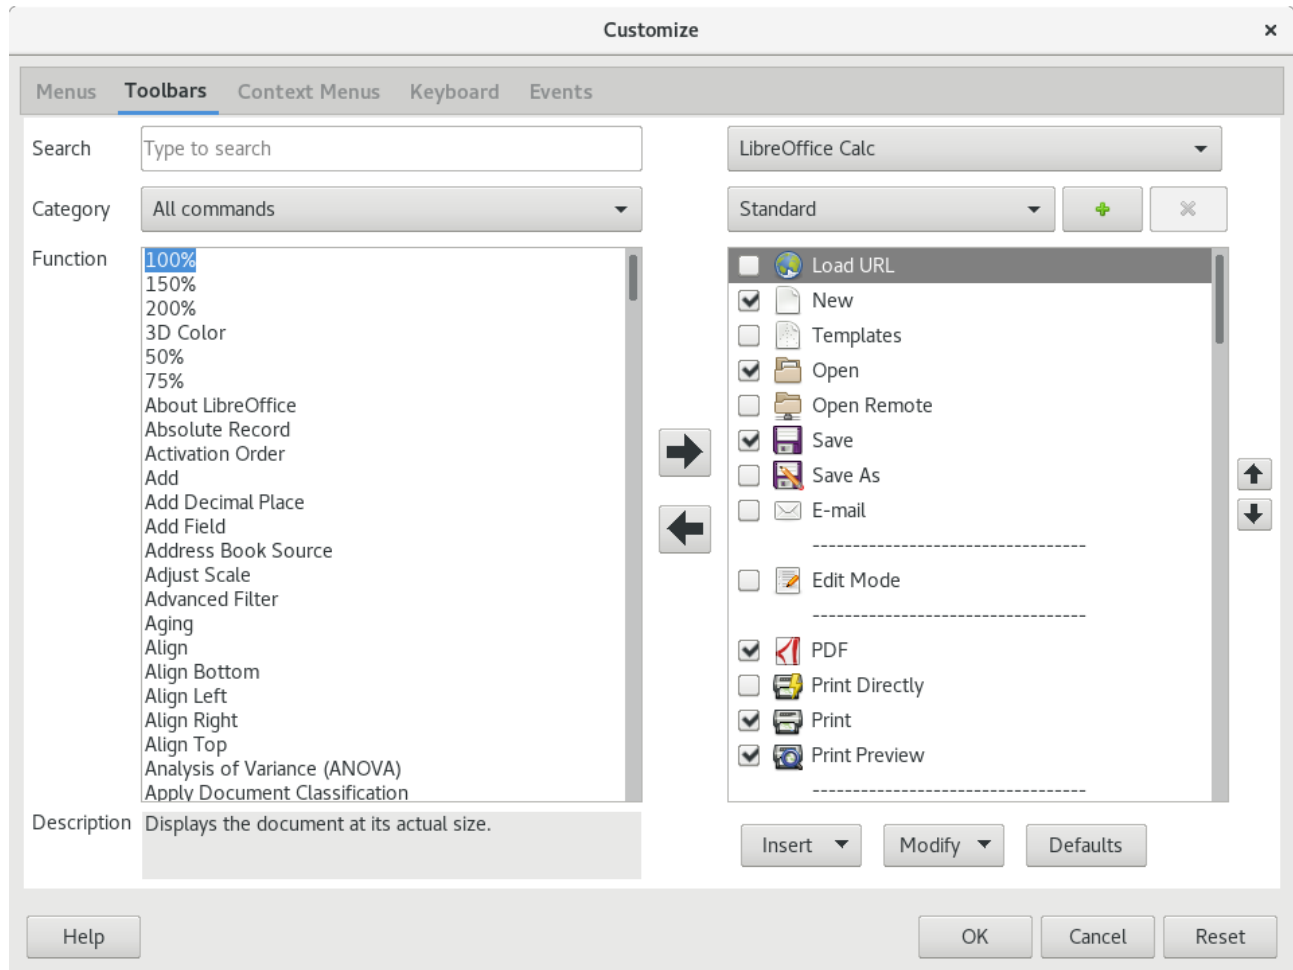

7. Click *OK*

Now the Marco PyRatAniShare is imported and can be executed e.g. on this way: Tools → Macros → Run Macro... → My Macros → PyRatAniShare → PyRatAniShare → PyRatAniShare
To simplify the execution it is possible to create button at the toolbar to run this macro and only one click is necessary to execute the macro.

Create Button at the toolbar to run the macro:

1. Go to *Tools* → *Customize...*

2. Choose *Toolbars*

3. Click on *All commands*

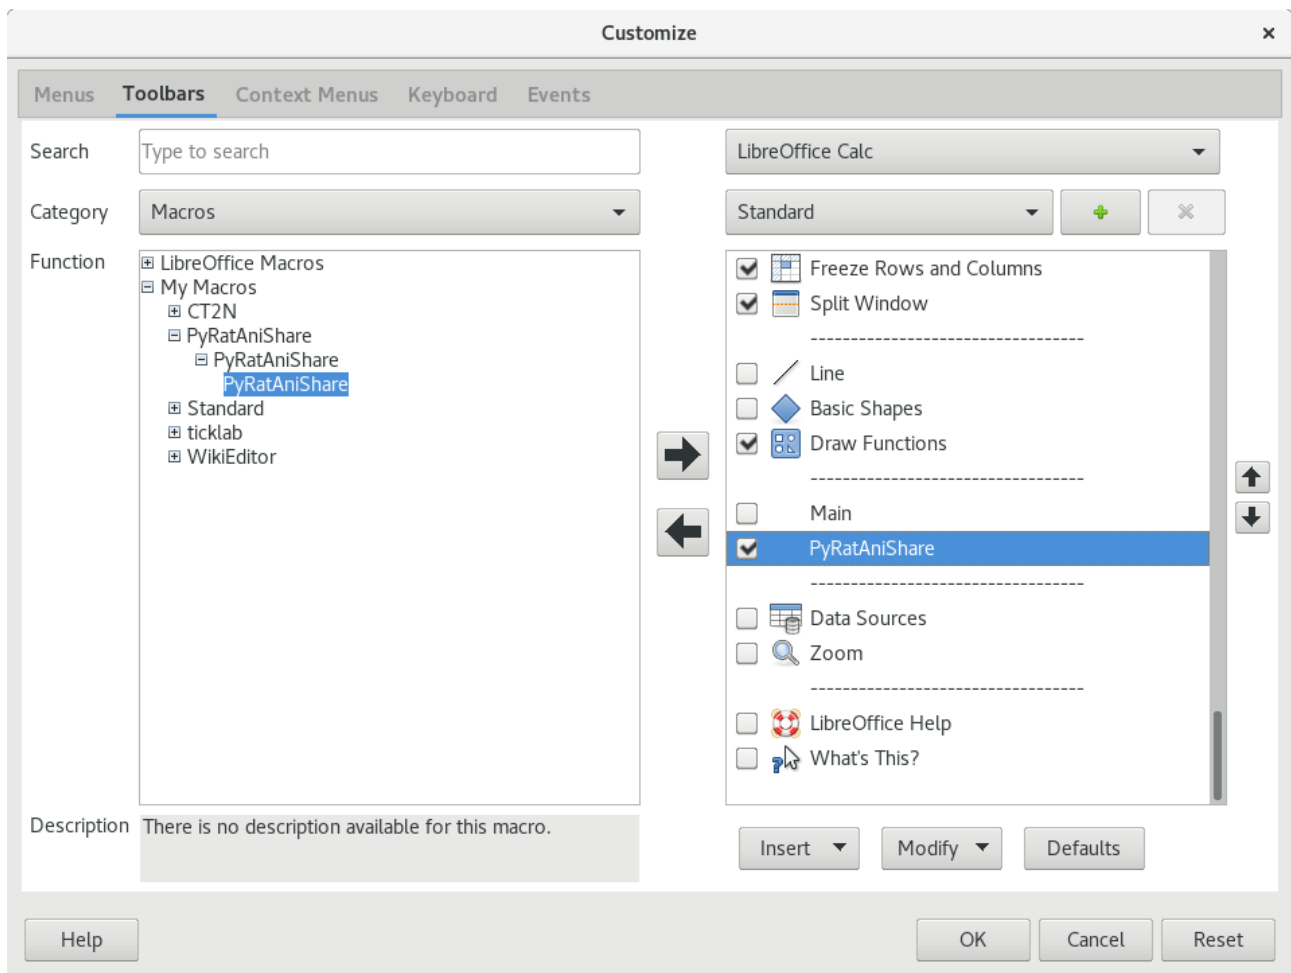

3.1. Choose *Macros* (second last choice)

4. Select Function: *My Macros* → *PyRatAniShare* → *PyRatAniShare* → *PyRatAniShare*

4.1. Click the right arrow button

4.2. Modify the place of the PyRatAniShare button at the toolbar with the up and down arrows on the right side.

4.3. Click the *OK* button

5. PyRatAniShare button is ready to use
